<td>Single Device Product</td>
<td>32686 Perineometer</td>
<td>The device may be used to assist in the correction of urinary incontinence and pelvic organ prolapse by means of exercise. It may also be used by a health care practitioner to assist in the diagnosis and monitoring of these conditions. The device consists of a rigid probe for temporary intravaginal use which offers resistance to a patient's voluntary pelvic floor muscle contractions and can provide an indication of the strength of these muscles.</td>
