#### Permitted Indications

No Permitted Indications included on Record

#### Indication Requirements

No Indication Requirements included on Record

#### Standard Indications

No Standard Indications included on Record

#### Specific Indications

#### Provisionally Registered Indications

TECVAYLI as monotherapy has provisional approval in Australia and is indicated for the treatment of adult patients with relapsed or refractory multiple myeloma who have received at least three prior therapies, including a proteasome inhibitor, an immunomodulatory agent and an anti-CD38 monoclonal antibody. The decision to approve this indication has been made on the basis of the overall response rate in a single arm study. Continued approval of this indication depends on verification and description of benefit in confirmatory trials.

#### Provisionally Registered Conditions

Provisional registration with conditions as specified in the letter dated 02 June 2023 from CESC PMAB advising of approval for the registration of the goods (PM-2022-01541-1-6) D23-5434818
